

AMC SAMPLE SYSTEM MULTI-MAX™

Next-Generation AMC Sampling System to
Monitor Gases in SEMI & HB LED Environments

Multi-Max incorporates our T-I Max series CRDS analyzers - robust, designed free of moving parts, resulting in a high mean time between failures and a very low cost of ownership delivering unprecedented performance.

BENEFITS

- Multi-point sample system with up to 32 points of analysis
- Sensitive, absolute measurement technique
- Measure Parts Per Trillion (PPT) levels of NH_3 , HF & HCL in cleanroom air
- Lowest cost of ownership and maintenance
- High specificity - no interference
- No periodic sensor replacement/maintenance
- Unprecedented speed of response
- Wide dynamic range
